

Real-Time Centralized Building Control

Intelligent Energy-Saver Enabler:
Use intelligently, save more, and earn more carbon credits.

Project Name:

// Intelligent buildings energy management system

Scope:

// Real-time & centralized monitoring, controlling and trending the buildings provision of energy to
“Keep the building’s energy bills healthy”

No. of Floors:	8
Area of Floors:	66243 sq. ft.
No. of Occupants:	Approx. 700
Deployed On:	Feb 2014
Project Associated Cost:	190 K USD
Energy-savings in 7 months:	77611 kWh
CO ₂ savings in 7 months:	139.76 tons
Cost-savings in 7 months:	Approx. 15%
