

## ASIC DESIGN OF SECURE CHIP MODULE RESULTING IN OVER \$1 BILLION REVENUE PROTECTION

### PROJECT SCOPE

- // Design of secure ASIC chips that are used in PayTV Smart Cards
- // Anti counterfeit chip deployment on the board

### SOLUTION HIGHLIGHTS

- // Complex cryptographic modules
- // Secure processing
- // Security built in during all phases from design through post production

### BUSINESS VALUE DELIVERED

- // Protected over \$1 Billion in revenue across multiple operators
- // Provided in-built security during all the phases from design to post production
- // Designed over 15 secure ASIC chips that are used in PayTV Smart Cards
